

Create custom business documents effortlessly to print, e-mail, fax, bar code and archive.

Easily automate form management and distribution with Reform Enterprise. Fully compatible with Sharp MFPs, this powerful tool will streamline your workflow with simplified editing and efficient point-and-click document distribution. With Reform Enterprise you can automatically route documents to fax numbers, e-mail addresses, MFPs or FTP sites – optimizing workflow and saving valuable time.

Sophisticated tools enable you to customize forms, invoices and other transactional documents, enabling you to automate processing while maintaining a professional image. What's more, Reform Enterprise is fully compatible with most operating systems and protocols, offering seamless expansion to the enterprise.

Complement your Sharp MFP and optimize workflow with FabSoft's Reform Enterprise.

Reform¹¹ ENTERPRISE®

KEY FEATURES

- **Generate customized forms, invoices** and more – eliminating outsourcing and storage fees of pre-printed forms
- **Seamlessly share and distribute electronic documents** across most applications or platforms
- **Create custom workflow solutions with the Modular Object Scanning Technology (MOST)* option** – a **Sharp Open Systems Architecture (Sharp OSA)** developed template
- **Automatically** archive, fax, e-mail, and print documents
- **Easily retrieve** documents with **detailed indexing** and **search** capabilities
- **Quickly check the status** of your document deliveries with the **Device Monitor Website**
- **New Reform Postal Sort option automatically verifies,** corrects and then CASS & MASS certifies addresses to qualify for a United States Postal Service® automation savings
- **New Snap Doc option automates image organization** – associating an image with a description using bar codes

Streamline document management and distribution with Reform's easy-to-use features.

Efficiently manage documents right from your desktop

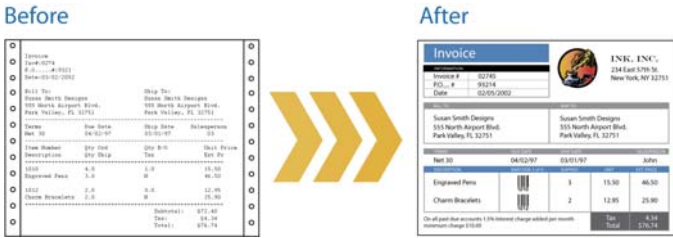

Reform's innovative print driver speeds up document processing and works seamlessly with any Sharp MFP. Manage printer functions such as, collating, duplexing, load balancing, sorting, PIN printing, error correction and more.

Fax and e-mail documents with point-and-click simplicity

Your entire workgroup can benefit from automated e-mail and faxing. With the ability to fax and e-mail documents directly from your application, Reform generates a cover page, locates the destination, then automatically sends the document to the specified recipient. Reform's e-mail capabilities support a variety of file formats including JPEG, BMP, PCX, TIFF and PDF. Reform is fully compatible with most popular faxing and e-mail systems.

Retrieve or reprint documents on-demand

Users can retrieve or reprint documents quickly and easily because Reform automatically saves the content of a document each time it is processed. Reform also provides seamless integration with 3rd party archiving systems, fulfilling all of your data storage needs.

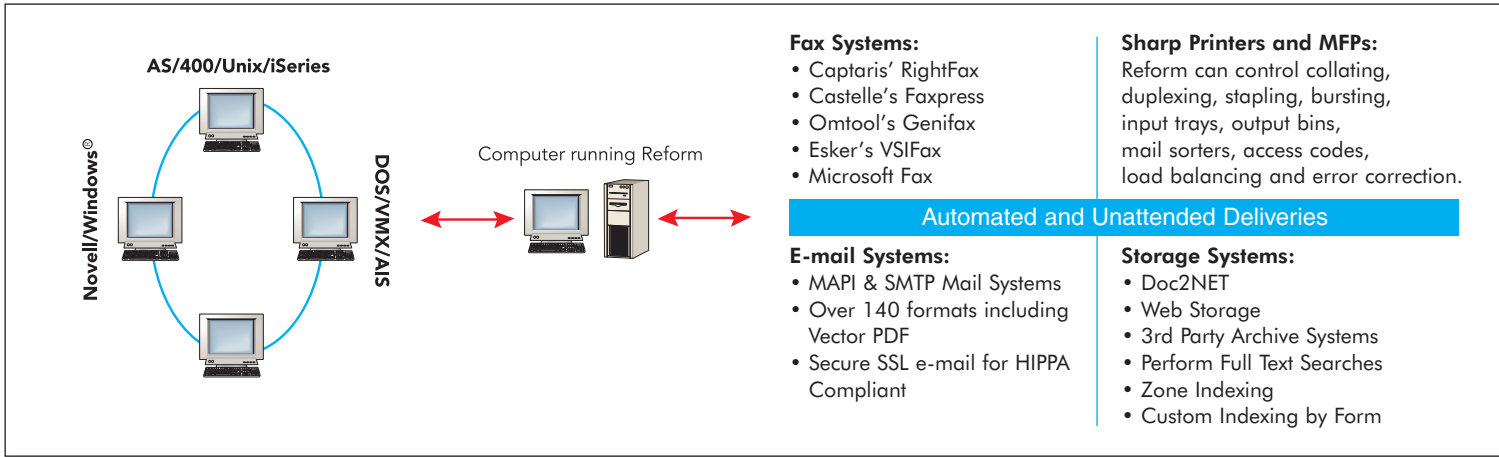

Easily customize business forms, invoices and more with drag and drop simplicity.

Add efficiency with customized, automated forms

Reform makes it simple to customize almost any type of form including invoices, statements, checks, purchase order, labels and more. Fully compatible with most forms and accounting systems, Reform provides unparalleled flexibility and efficient access and distribution for any busy workgroup. User-friendly drag and drop functionality makes it easy to add images, logos, signatures and bar codes to documents for complete automated processing.

Create customized workflows with the Modular Object Scanning Technology (MOST)* Option

Developed with the Sharp Open Systems Architecture, MOST is a utility that can be built upon and modified as needed – allowing the development of customized workflows that fit your business processes. MOST enables document distribution right from the convenience of the Sharp MFP screen. So with just one trip to the MFP, users can configure document routing to printers, fax, e-mail and archive systems.
